

Sweet Dreams Start Here: Introducing the Taf Toys Bedtime Kit

Say goodbye to sleepless nights and hello to peaceful slumber with the **Taf Toys Bedtime Kit**—the ultimate solution for a smoother, more enjoyable bedtime routine. Perfect for those precious early months, this thoughtfully curated kit is packed with 12 calming activities designed to soothe your baby and help them drift off to dreamland.

The *Bedtime Kit* includes a gentle light and soothing music unit that plays 20 minutes of calming tunes, featuring two night-time melodies and comforting sounds like soft

shushing and soothing water. Perfect for creating a calming bedtime atmosphere, this music will help lull your little one to sleep.

The kit also comes with 7 double-sided visual stimulation cards. One side features high-contrast, sleepy-time characters, while the reverse shows colourful images of Rylee Bunny completing his evening routine—perfect for establishing a familiar and relaxing atmosphere. Use the cards during tummy time or turn them into a mini book for your growing baby to explore.

Encourage early dental care with your baby's first toothbrush, a soft silicone brush that's fun to chew on, gently introducing the sensation of bristles on their gums. And for added comfort, the *Bedtime Kit* includes a soft blankie with an attached teether and a separate bunny teether, providing security and soothing sensations throughout the night.

Designed to make bedtime a breeze, the *Taf Toys Bedtime Kit* helps your little one sleep well and dream sweetly - giving parents a more restful experience, too.
