Scout Smart Camera

The camera that gets to know your pets

The AI-powered Scout Smart Camera knows which pet is which, what they're up to, and sends you the most important moments right when they happen. So you can leave your worries behind, not your pets.

KEY FEATURES:

MULTI-PET RECOGNITION - Scout knows who's who

Scout knows up to 5 cats or dogs by name, from any angle. Pet profiles in the app make it easy to see what each pet is up to, revisit any moment, and share your favorites with a tap.

BEHAVIOR RECOGNITION- Skip straight to the good stuff

See the moments that matter, right when they happen, without scrubbing through hours of footage. Scout detects important activities like eating and drinking, records a clip, and notifies you instantly.

PET "SELFIE" - Your pet can now say "hi"

When your pet looks into the camera, Scout captures their selfie and sends it to your phone. It's a little check-in from the one who misses you most.

SMART SUMMARIES - Their whole day, organized

See their day on your phone and at a glance. Scout sends you a summary of each pet's activities, plus a highlight reel of their most important moments.

CAMERA FEATURES - Your favorite show is always on

Scout keeps you and your pet connected day and night with 1080p HD video, a 360° pan-and-tilt view, color night vision, and two-way audio. When Scout's off duty, slide the manual privacy cover for extra peace of mind.

*AI-powered behavior tracking, highlight reels, and video cloud storage require a subscription.

MSRP: £99.99

Color options: White / Black (DE and FR only)
