Boats

Set sail on a delightfully detailed and richly illustrated voyage into the world of ships and shipping, as the book **Boats** from *Prestel* introduces young readers to an oceanic array of naval phenomena.

As in his previous book, *Planes*, Jan Van Der Veken takes a kaleidoscopic approach to his subject. Deftly weaving history, science and culture, he looks at a fascinating array of subjects—historic vessels, amazing voyages, extraordinary figures, technical details and cultural phenomena. Throughout the book, vibrantly coloured, retro-futurist illustrations are as beautiful as they are informative.

Readers will learn why seas have streets, which bodies of water are considered cursed, how a ship stays afloat, how to use a sextant and how lighthouses work. Providing hours of entertainment, this is the perfect book for naval enthusiasts of every age.
